IT Engineer with hands-on experience in infrastructure administration: LAN/VLAN networks, VMware virtualization, backups, and monitoring workstation compliance with security requirements. I am actively developing my skills in AWS cloud and Linux system administration. I want to grow towards the role of Network Engineer, Cloud Engineer or DevOps.

Experience

Junior IT Specialist *Forvia S.A. Wałbrzych 03/2025 - present*

- Full technical support (ticketing) for about 600 office users and administration of about 650 end devices (workstations, printers, scanners).
- Administration and development of the LAN/VLAN network infrastructure, including management of 2 core switches (main and backup environment) and access switches, as well as physical maintenance (patching ports). Migration of devices from Cisco IE to Siemens Scalance.
- Management of a virtual environment based on 8 VMware ESXi hosts (maintaining production-critical systems such as SAP MII and Traceability), supervision of vSphere clusters and physical hardware, and carrying out high availability (failover) procedures.
- Administration of backup and data archiving systems using the Commvault platform, including retention management and physical handling of tape libraries (LTO).
- Monitoring the compliance of local infrastructure with global security standards (KPI > 95% for AD, AV, WDE, RSE). Checking that the Patch Management process works correctly on end devices, and diagnosing and solving problems on workstations that do not meet the requirements.
- Continuous monitoring of infrastructure availability (CRIT/DOWN alerts) using Grafana and Checkmk.

Skills

- Administration and Infrastructure: Active Directory (account and permission management), Windows Server, VMware vSphere, Lenovo XClarity, Commvault (backup/LTO tapes).
- Computer Networks: LAN/VLAN, NAT and DHCP configuration, Cisco IOS, Siemens Scalance, pfSense basics.
- Monitoring and Maintenance: Grafana (KPI indicators), Checkmk.
- Systems and Tools: Linux (CLI basics), Git.

Education

WSB Merito Poznań | 10/2026 - present

Master's studies, field of study: Computer Science
Specialization: Cloud Solutions Outsourcing

Akademia Techniczno-Artystyczna wydział Wrocławska Akademia Biznesu | 10/2022 - 07/2026

Engineering studies (Bachelor's), field of study: Computer Science

Specialization: Cybersecurity and Computer Networks

Projects

AWS Cloud Infrastructure & GitOps Automation (Lab/PoC)

- IaC automation: Building AWS VPC infrastructure (subnets, NAT Gateway, ECS, VPN) with Terraform.
- CI/CD and secrets security: Configuration of passwordless authentication with AWS OIDC and Ansible Vault.
- Services and identity configuration (Ansible & AD DC): Automatic provisioning of a Samba4 AD server with RBAC structures (groups and users) and service accounts.

Homelab & Infrastruktura Lokalna

- Network and virtualization: Designing an environment with a pfSense firewall, VLAN segmentation, and service virtualization.
- Services and monitoring: Administration of AD (GPO, RBAC), containerization (Docker / k3s), and deployment of Prometheus + Grafana.

Certificates and Courses

- Udemy: Complete Linux Training Course | In progress
- Udemy: AWS Certified Solutions Architect Associate (SAA-C03) | In progress
- Cisco Networking Academy: CCNA - Introduction to Networks | 01/2025

Languages

- Polish – native
- English – intermediate (B1/B2)
